

Florian Poulin

Swiss, currently in Singapore (EP)
florian.poulin@gmail.com
(+65) 8344 9176

Software Engineer specialized in J2EE middleware development. Team leader in an Agile startup environment delivering various services around Licensing, Monetization and e-Commerce.

Experience

Head of Product Engineering

@ Forbes Digital Commerce, Singapore, 2013 – now

Leader of a 15 Software engineers team distributed across three countries (Switzerland, Singapore and Romania). Architect of an E-Commerce platform exposed through a RESTful API.

Software Architect

@ Lotaris SA, Switzerland, 2011 – 2013

Responsible for the design and implementation of an in-app monetization service for mobile app developers. Scrum master and Agile evangelist in a team of 10 Software engineers based in Switzerland and Romania.

Senior Developer

@ Lotaris SA, Switzerland, 2009 – 2011

Member of the core development team of a B2B service for Mobile app monetization. Key technical contributor from a blank page to a Level 1 PCI-compliant service used by major ISVs (including Fortune 500).

Research Assistant

@ IICT / HEIG-VD, Switzerland, 2007 – 2009

Research assistant with a focus on Data-Mining and Information Retrieval. Teaching assistant in various courses including Data-Mining, Information Retrieval, Computational Complexity Theory and Algorithmics.

Education

B.Sc. Software Engineering

@ HEIG-VD, Switzerland, 2003 – 2007

Thesis: "Gametes: Genetic Engine Towards Evolutionary Software" (a Java library for genetic-algorithms-based software). Ranking A (top 10% of the promoted students).

Diploma in Mediamatics

@ CPNV, Switzerland, 2000 – 2003

Multimedia studies (Web, Programming, 3D Modelling, Marketing), with combined professional maturity. CPNV Best Student Award 2003.
